## OTBL Mehsana Special

### Land Restoration and Bioremediation of Oil Soaked Soil Mehsana Asset

- There are frequent line leakage in Mehsana Asset due to damage in pipeline Passing from agriculture land.
- OTBL helps in restoring the agriculture land through Bio-remediation process.
- Till now OTBL has completed 150002.0525 M3 Bio-remediation work in Mehsana Asset.

#### PHOTOGRAPHS OF LAND RESTORATION

#### BL GGS III: 8" Old Trunkline leakage

#### BL GGS III: BL # 183, 8" Flow line leakage

#### JTN GGS I: JTN # 6 Header 8" Group Line leakage

## A Green Initiative by OTBL in Gujarat

# Protectors of the Environment (Phase III)

### ~ Adopting Energy Efficient Choices for Sustainability ~

'Protectors of the Environment' an educational programme recently completed second phase and is currently in its third phase with the on-going concluding sessions. Around 3000 students are participating in this programme and **are committed to spread the message of energy conservation in schools and neighbourhood**. The participating students are from three districts of Gujarat –**Mehsana, Bharuch, and Ahmedabad** in both government and private schools in 4 urban and 2 rural locations per city.

The participating schools were finalized through a selection procedure based on their level of involvement, willingness and commitment to the programme. The teaching faculty and the principal of respective schools motivated the students. Experts from TERI and OTBL visited schools, where students gathered to understand the importance of energy-efficient choices and how they can contribute to create a better future. All the participants received **Save Energy to Save Future**, a holistic book that includes facts about energy, types of energy, solutions to control global warming and do-it-yourself activities to enhance their learnings about the importance of saving power and using it efficiently. The programme initiated several tools such as visual instruction, demonstration of Energy Audit, and hands-on 'application and learning'.

These sessions attempt to create environmental awareness among children and help them to become **Green Architect** and **Energy Savers**. Enthusiastic students participated and were involved in pre-project sample assessment, demonstration of energy audit done by experts, and documentation and photography among other activities.

As part of skill development, a quiz was organized in the concluding session to evaluate a child's sensitivity towards issues of Energy & its conservation. Students who gave the right answers were rewarded with a badge of honour for their efforts.

**The schools participating in the programme from Mehsana are:** Kendriya Vidyalaya ONGC Mehsana, Royal English Medium School, Eklavya English Medium School, Rangoli International School, Sahjanand English School, and Vardhman Vidyalaya

**In Ahmedabad, the participating schools are:** Podar International School, K. V. Viramgam, Khyati World School, St. Kabir School, Little Star High School, and Firdos Amrut School

**The schools participating from Bharuch are:** Ascent School, Shantanu Vidyalaya, Narayan Vidhya Vihar, Universal School, RMPS International School, and Podar World School.

The programme is scheduled to be concluded in January 2020 where all the participating **schools will be applauded for their efforts towards adopting energy-efficient choices and envisioning a greener planet.**
